PROJECTS

Utility Tools website. Developed a website of handy tools such as QR Code generator, PDF to Word converter, URL shortener and more. Laravel framework was used for it along with Bootstrap for responsiveness. For backend PHP and Python libraries were employed along with MySQL serving as the database.

Textbook.nyc Website. Developed a responsive website for a client using Laravel, Bootstrap and JavaScript. ([See it here](#))

AI Powered Content Generator. Developed a website for text-to-text and image-to-text based content generation with the help of Google's Gemini model. The project was developed using Laravel and JavaScript at core.

EXTRA-CURRICULAR ACTIVITIES

- Surfing the web in pursuit of technological advancements.
- Reading fictional books and graphic novels.
